2020 PRODUCT GUIDE

Let's Be Direct
We use our imports and commodities expertise to bring you the best products in the world.

We proudly support family farmers and their communities worldwide.

Having efficient supply chains and low operating costs means that we're able to put the maximum value of every purchase back into the hands of our suppliers to keep supporting their well-deserving businesses and communities.

We're happy to travel 9,000 miles for a handshake.

In fact, we insist on it. Personally meeting every family farmer that we work with has allowed us to build a trusted network of knowledgeable, hard-working suppliers around the world who align with our commitment to purchasing wholesome food that is good for people and good for the planet. We choose to work with farmers that observe socially responsible farming and harvesting practices.

 Major Products Categories

We operate across
5
 Continents Worldwide

We travel to over
43
 Countries to meet suppliers

On the ground expertise helps us meet your demand.

Our "on the ground" expertise allows us to anticipate and fill your demand. Being immersed in our supplier's businesses provides us with invaluable insights into the world markets for imports and commodities. We're privy to potential yields and able to anticipate supply level changes and product specification adjustments, often much further in advance than other importers.

Having first access to ground-level information decreases the opportunity for surprises, delays or unexpected price changes to occur throughout the importing process.

Our close relationships with suppliers is at the heart of our global, ethical sourcing

Quality Assurance
Creating a safe and wholesome food supply starts with implementing world-class QA systems.

We own the quality and assurance process from origin to delivery.

The commodity industry can be difficult to regulate, so we implement our own strict standards, specifications and food safety systems throughout our supply chain. If it doesn't pass our quality and integrity tests with flying colors, we reject it—simple as that.

We trace every product from its origin to your door to ensure that it upholds our strict sanitation, specification and safety standards at every checkpoint.

Every production facility we use is registered with the US Food and Drug Administration (FDA) and meets their requirements for sanitation and food safety. We also conduct third-party audits and inspections to guarantee that every product meets and maintains our top-tier quality levels and is produced according to our specifications in species, weights, and all other areas.

Our quality assurance enforcement extends to every Limson supplier in the world.

Our team of Vendor Compliance Managers travel internationally to inspect, validate, and negotiate products directly at the source.

Limson-approved suppliers must adhere to our product specifications, foreign/domestic suppliers' HACCP and quality programs, international third party pre-export QA inspection services and product recall/withdrawal procedures. We also require all suppliers to have a Global Food Safety Initiative (GFSI) bench-marked audit.

How do we do it?

- Regular overseas social audits conducted by internal and third-party auditors
- Dedicated reviews systems and programs
- Extensive data collection and review to ensure we source from the safest plants in the world
- Testing to ensure that all processing technology used at every source is first-rate
- Third-party audits to ensure all products maintain passing criteria
- All products sold guaranteed to be at 100% net weight
- All products labels guaranteed to hold the exact item specifications you expect

A few of the systems we've implemented to make sure that every import reflects our world-class standards:

- Sourcing and inspection of raw materials, in-line production monitoring, pre-inspection prior to export to the United States
- Arrival inspection upon receipt of goods into the storage within the United States
- Purchase order inspection prior to shipment to the customer
- On-site plant visits by Limson Trading personnel and/or third party inspection services within the local countries to all facilities processing branded products.
- HACCP plan certificates are maintained, as available, and updated from all branded suppliers
- Annual, international third party food processing/HACCP audit certificates maintained
- Annual reviews of suppliers QA programs and product performance histories
- Periodic product cutting scheduled to determine compliance of product attributes

Organizations we work with

canned fruit & vegetables

Custom packed to your size & specs

Artichokes

Scientific name: *Cynara scolymus*

Country of Origin: **Spain**

Processed in: **Spain**

Grade: **U.S. # 1**

* Hearts 8-10 ct * With Stem marinated * Hearts 30-40 ct
