PROJECTS

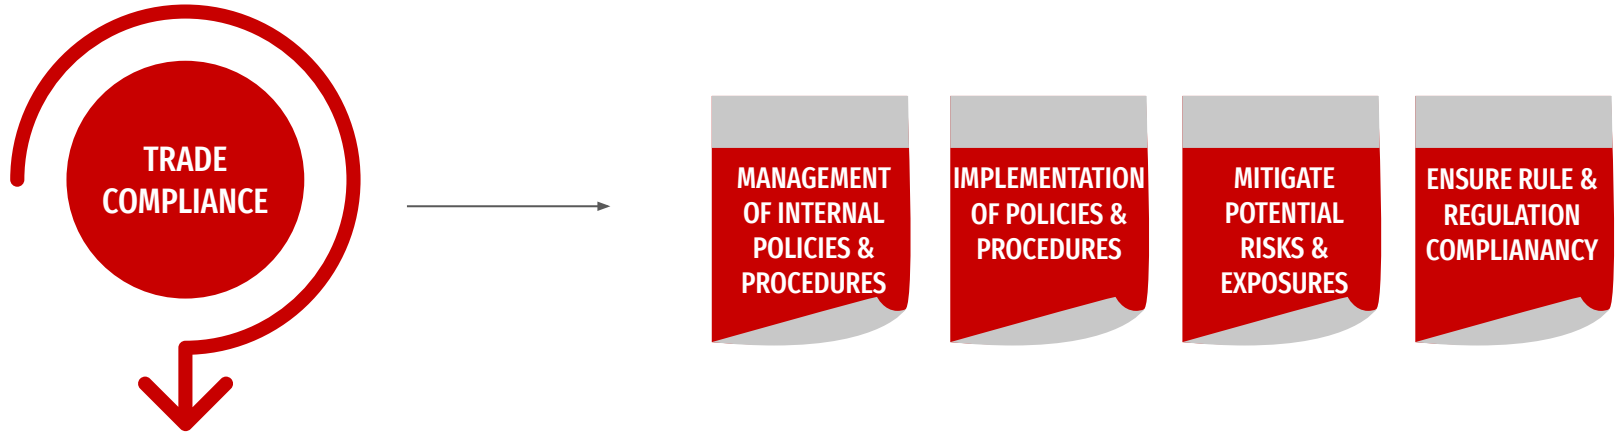

Inbound logistics is the way materials and other goods are brought into a company. This process includes the steps to order, receive, store, transport and manage incoming supplies. Inbound logistics focuses on the supply part of the supply-demand equation.

NA Outbound Logistics

Focuses on the demand side of the supply-demand equation. The process involves storing and moving goods to the customer or end user. The steps include order fulfillment, packing, shipping, delivery and customer service related to delivery.

NA Trade Compliance

NA Business Operations

Business operations is everything that happens within a company to keep it running

NA Trade Compliance

Trade compliance is the practice of simply respecting and following all regulations on imports.

Full compliance is necessary to ensure and safeguard the ability of GFS to effectively compete in the domestic and international marketplace.
